5. Nature of the Emergency **The emergency is a wildland fire that is burning uncontrolled and threatening endangered species habitat that would take decades to rehabilitate if at all possible. The habitat loss would cause endangered species to die from loss of food and shelter. The services fo bull dozers are needed immediately to build fire breaks to control the wildland fire. We solicit vendors based on immediate availability to respond for the incident. Without the bull dozer services the wildland fire will not be controlled and will result in greater loss of endangered species habitat and create far greater safety risks for personnel controlling the wildland fire.**
