 05-73-J A previous Sole Source was in force. These are specialized parts for supplying Aircraft the power that they need while they are stationary at the Hardstands (parked). They are not generally stocked at a regular electrical supply vendor. CESP is the only vendor that we have found that will order and/or stock these Airorts use only parts. These replacement parts are used on highly Specialized electronic and electrical mechanical equipment and used only in airport environments.

9. Details of the process or procedures to be followed in selecting the vendor to ensure maximum fair and open competition as practicable:
 This is the only vendor found. This vendor has considerable worldwide contacts & exhausts all means possible to expedite and fulfill our operational needs and requirements. The parts indicated are for the maintenance and repair of sophisticated electronic and electromechanical automated systems installed for high efficiency operations of a modern, high traffic density airport such as HIA in manner satisfactory to the Federal Aviation Administration (FAA) and as prescribed by Federal Aviation Regulation (FAR).

Chief Procurement Officer's comments:

Because procurement exemption PE-06-094-C for the subject GPS parts does not expire until 1/31/07, this request for exemption should have been submitted as an amendment to the existing procurement exemption.
