8. Explanation describing how procurement by competitive means is either not practicable nor advantageous to the State:

This procurement exemption has been prepared to finance and build homes directly impacted from Menehune Development Company's inability to complete the construction of homes on Hawaiian Home Lands.

Over the past few years, the Menehune Development Company was in the process of building homes on three islands, Lanai, Kauai and Hawaii. On Monday, November 26, 2007 the Menehune Development Company notified the Department of Hawaiian Home Lands (DHHL) they would not be able to complete the houses it was contracted to build. On Friday, November 30, 2007, the Menehune Development Company notified the bonding company, Hardware Hawaii, Inc., of the same.

For those lessees with a "performance" bond, Hardware Hawaii will complete the construction of those homes in accordance with the construction contract. DHHL will be working alongside beneficiaries to assure the bonding company fulfills their construction obligations. If there is a discrepancy between the bonding company and the beneficiary, DHHL will evaluate whether or not DHHL should intervene.

For those lessees without a "performance" bond, Hardware Hawaii is not obligated to complete these homes. Therefore DHHL, as an option, desires to build the lessees' homes at the amount of the lessees' construction contracts. In addition, DHHL will treat this project like our master plan community projects where the builder is obligated to DHHL and the "performance" bond and interim financing obligations are between DHHL and the contractor. The lessees will have no legal or financial obligation until the homes are completed.

Given that some lessees have already waited over two years for their home, any extension of the project using normal procurement methods will result in families having to wait even longer for their homes to be completed.

Regarding the Lālāmilo Project, Menehune Development Company hired subcontractors to perform specific work at Lālāmilo. These subcontractors were in the midst of performing work at Lālāmilo when Menehune Development Company filed bankruptcy. DHHL therefore recommends that DHHL enter into direct contractual agreements with these aforementioned subcontractors to complete work already performed at Lālāmilo.
