Adolescent Substance Abuse School-Based Treatment Services

I. Introduction

A. Overview, purpose or need

The mission of the ADAD is to provide the leadership necessary for the development and delivery of quality substance abuse prevention, intervention and treatment services for the residents of the State of Hawaii. The Division will plan, coordinate, provide technical assistance, and establish mechanisms for training, data collection, research and evaluation to ensure that statewide substance abuse resources are utilized in the most effective and efficient manner possible.

Substance abuse services are mandated by Chapter 321, HRS which charges the Department of Health with the responsibility of coordinating all substance abuse programs including rehabilitation, treatment, education, research and prevention activities and Chapter 334, HRS which requires that the State provide a “comprehensive mental health system utilizing public and private resources to reduce the incidence of mental or emotional disorders and substance abuse....”

The purpose of this RFP is to provide innovative school-based substance abuse treatment services specifically designed for adolescents in public middle/intermediate schools.

In the Spring of 2002 the State of Hawaii Department of Health, Alcohol and Drug Abuse Division, and the University of Hawaii collaborated in the Hawaii Student Alcohol, Tobacco, and Other Drug Use Study. This Study was designed to assess prevalence and trends in substance use, treatment needs, and risk and protective factors that predict substance use and abuse among Hawaii public and private school students statewide. A survey was the main instrument used to conduct the study and it was administered anonymously to over 27,995 sixth, eighth, tenth, and twelfth grade students in 181 public and 34 private schools. The self-administered questionnaire incorporated criteria from the DSM-III-R to estimate the numbers of youth who need treatment for a substance abuse disorder. Estimates for the State and counties are as follows:

Statewide substance abuse treatment is needed for 1.0% of sixth graders, 6% of eight graders, 16.0% of tenth graders and 21% of twelfth graders for any substance abuse. Most students need treatment for both alcohol and drugs than either one alone. Many students who abuse alcohol also abuse illicit drugs, and the most common illicit drug abused is marijuana.

Lifetime or ever use of any illicit drug steadily increased in 1993 and 1996, and continued to increase in 1998 in the upper grades and decreased across all four grade levels in 2000. In 2002, lifetime or ever use of any illicit drug dropped substantially at all grade levels. Hawaii lifetime or ever use prevalence reports for any illicit drugs are at least six percentage points lower than nationwide reports for 8th (22% vs. 32%), 10th (40% vs. 48%), and 12th graders (49% vs. 55%).

Alcohol use by adolescents in Hawaii, as well as nationwide, has remained fairly stable and high over the years. Nationwide, alcohol reports remain unchanged in 2000. In Hawaii, lifetime prevalence reports for alcohol dropped substantially in 2000 and 2002, bringing lifetime alcohol prevalence reports to an all-time low for students at all grades. Lifetime alcohol use by high school seniors declined to 53% in 2002 from its 2000 level of 77% and 81% in 1998. However, 54% of seniors reported being drunk at least once. Twenty-one percent (21%) of twelfth graders responded that they had used alcohol by the age of 12. Females in grades 8 and 10 had higher treatment needs than males in grades 8 and 10. The males in grade 12 had higher treatment needs than females in grade 12. Forty-three percent (43%) of high school seniors reported monthly use of alcohol. Daily use of alcohol among twelfth graders in 2002 was 3.3%, similar to the 12th grade reports nationwide at
3.5%. Treatment was indicated for 21% of twelfth graders whose responses met DSM-III-R criteria for alcohol abuse (6%).

Treatment needs are highest in Hawaii and Maui Counties (14% each) and lowest in the City & County of Honolulu (9%) and Kauai County (13%). Although the estimated treatment needs are the highest in Hawaii County and lowest in the City & County of Honolulu, the City & County of Honolulu has a much larger number of students with treatment needs (5,458) than Hawaii (1,787), Kauai (671), and Maui (1,558) counties.

The 11,319 students identified as needing substance abuse treatment still attend school, 11% of Hawaii students in grades 6 through 12 need treatment for alcohol, drugs, or both alcohol and drugs. Estimates are slightly higher for public school students (11%) than private school students (10%). School-based treatment programs make treatment easily accessible to youth who need treatment. Part of the core continuum of care needed for adolescents is early identification followed by early treatment. Offering school-based substance abuse treatment is an efficient and effective way to intervene in a timely manner.

B. Planning activities conducted in preparation for the RFP

A Request For Information (RFI) in conjunction with this RFP was held on July 7, 2006 on Oahu, July 10, 2006 on Hawaii and July 11, 2006 on Maui. The summary of the RFI is in Attachment E-8.

C. Description of the goals of the service

The goal of the requested service is to reduce the severity and disabling effects related to alcohol and other drug use by making innovative services available to adolescents. This service consists of School-Based Outpatient Treatment for adolescents on the islands of Oahu, Hawaii, and Maui County.

D. Description of the target population to be served

The target population is middle school age adolescents who meet either the Diagnostic and Statistical Manual of Mental Disorders IV Text Revision (DSM IV TR) criteria for substance abuse or dependence or the American Society for Addiction Medicine Patient Placement Criteria Second Edition-Revised (ASAM PPC-2R). All clients in any level of treatment shall meet the most current version of the ASAM PPC for admission, continuance, and discharge from Level 0.5, Early Intervention, to Level I Outpatient Treatment.

E. Geographic coverage of service
The service area for this RFP includes the islands of Oahu, Hawaii, and Maui County. The service requested is school-based outpatient substance abuse treatment at the middle school level.

Treatment awards for middle/intermediate schools will range from $10,000 to $90,000 per school based on enrollment of the Department of Education Official Enrollment Count, 2004-2005 school year.

ADAD anticipates* awarding approximately $1,817,500 in funding for substance abuse treatment in the following middle/intermediate schools:

Complexes represent a more manageable scope of responsibility, situate resources and decision making closer to schools and improve student support as a continuum from kindergarten to graduation.”

To facilitate this alignment, ADAD is seeking providers who have (or who demonstrate, through past history, the ability to develop) a working relationship within the school complex and knowledge of the resources and personnel not only in the middle/intermediate school being applied for but in the elementary and high schools in the complex as well.

1) For **Actual Expenditure** contracts, the APPLICANT shall submit monthly the **Statement of Revenue and Expenditures** report, (ADAD Fiscal Form 200, 9/95).

2) For **Actual Performance** contracts, the APPLICANT must have sufficient computer capacity to utilize ADAD’s computerized **POS Provider Sub-system** and shall submit monthly requests for reimbursement (invoices), client services information and **Client Data System (CDS)** data on computer diskette. CDS forms include **Admission, Discharge and Follow-Up Report** forms. A hard copy of the monthly invoice with an original signature shall also be submitted.
3) The APPLICANT receiving federal funds or a combination of general and federal funds shall submit final invoices no later than 45 days after the end of each contract year, or by January 15, whichever comes first. Lapsing of funds will occur if final invoices are not received in a timely manner.

BEST PRACTICES/EVIDENCE-BASED PRACTICES

The following sources provide resources and links to Internet web sites referencing evidenced-based best practices, such as a cognitive-behavioral approaches, motivational interviewing techniques, and screening and assessment tools that are required to be incorporated into substance abuse treatment programs funded by ADAD.

DEFINITIONS OF TREATMENT ACTIVITIES

Reimbursable Activities:

All individual, group and family sessions shall involve direct, formal, clinically appropriate face-to-face contact with a client and/or significant other. A professional staff person must be actively involved in the provision of the service. Clients meeting on their own to read, watch videos, or run a support group will not be considered as reimbursable sessions.

The draft Health Insurance Portability and Accountability Act (HIPAA) Code and Description (HCPCS) has been included at the beginning of each definition. The HCPCS definitions and codes have not been finalized. Adjustments will need to be made in definitions and codes when they are finalized if there are differences.
Individual Sessions May Include the Following:

A. **SCREENING**

**HIPAA**
- H0002-Alcohol/and/or drug screening to determine eligibility for admission to a treatment program.

**ADAD**
- The process by which the client is determined appropriate and eligible for admission to a particular alcohol and/or drug treatment program. The determination of a particular client's appropriateness for a program requires the counselor's judgement and skill and is influenced by the program's environment and modality, as well as the use of established patient placement criteria.

- Important factors include the nature of the substance abuse, the physical condition of the client, the psychological functions of the client, outside support, previous treatment, motivation, and program philosophy.

- Eligibility is determined by evaluation of demographic characteristics, income level and referral source, as well as other guidelines reflected in the RFP.

- **NOTE:** Programs will only be reimbursed for screenings that result in a client's admittance into the program.

B. **ASSESSMENT**

**HIPAA**
- H0001-Alcohol and/or drug assessment.

**ADAD**
- The evaluation following admission by a clinician to determine the nature and extent of an individual’s abuse, misuse and/or addiction to drugs, including all services related to identifying the detailed nature and extent of the person’s condition with the goal of treating the client in the most appropriate environment and formulating a plan for services (if such services are offered.)

- The process by which a counselor/program identifies and evaluates an individual's strengths, weaknesses, problems and needs for the
development of a treatment plan. Although assessment is a continuing process, it is generally emphasized early in treatment.

- The counselor evaluates major life areas (e.g., physical health, vocational development, social adaptation, legal involvement and psychological functioning) and assesses the extent to which alcohol or drug use has interfered with the client's functioning in each of these areas. The result of this assessment should suggest the focus of treatment.

C. **TREATMENT PLANNING**

HIPAA

- T1007-Alcohol and/or substance abuse services, treatment plan development and/or modification.

ADAD

- Alcohol and/or Other Drug (also known as Chemical Dependency or Substance Abuse) (service) Plan Development and/or Modification means design or modification of the treatment or service plan for alcohol and/or other drug abuse. This may be the initial plan for a client already engaged.

Treatment planning is also the process by which the counselor and the client identify and rank problems needing resolution, establish agreed upon immediate and long-term goals, and decide upon a treatment process and the resources to be utilized.

- The language of the problem, goal, and strategy statements should be specific, intelligible to the client and expressed in behavioral terms.

- The plan describes the services, who shall perform them, when they shall be provided, and at what frequency.

D. **INDIVIDUAL COUNSELING**

HIPAA

- H0004-Alcohol and/or drug abuse services; individual counseling by a clinician.

ADAD

- Individual counseling is the utilization of special skills to assist individuals in achieving objectives through exploration of a problem and
its ramifications, examination of attitudes and feelings, consideration of alternative solutions, and decision-making.

Various counseling approaches such as motivational interviewing, reality therapy, client-centered therapy, cognitive, behavioral, etc., may be used.

Group Sessions May Include the Following:

A. PROCESS GROUPS

HIPAA

- H0005-Alcohol and/or drug services; group counseling by a clinician.

ADAD

- These involve the utilization of special skills to assist groups in achieving objectives through the exploration of a problem and its ramifications, examination of attitudes and feelings, consideration of alternative solutions, and decision-making. The maximum number of total clients (ADAD-funded plus others) per process group should generally not exceed 15. Groups held that exceed 15 clients need to be clinically justifiable and documented appropriately in order to be reimbursed.

B. EDUCATION GROUPS

HIPAA

- H0025-Alcohol and/or drug prevention education; delivery of services with target population to affect knowledge, attitude, and/or behavior.

ADAD

- These groups have as their primary objective the provision of information by the counselor concerning alcohol and other drugs and available services and resources. These groups tend to be didactic with a specified curriculum as the foundation for the session.

- Video and reading material may be used to supplement the group but the counselor must be actively involved in leading the session.

C. SKILL BUILDING GROUPS

HIPAA

- T1012-Alcohol and/or substance abuse services, skills development (or
ADAD

- Skill Building Groups means activities to develop a range of skills to help maximize client community integration and independent living. The essential aspect of these groups is that the client is taught via demonstrations and practice how to do something that requires a skill.

- The skills taught can be divided into either daily living skills (e.g., managing money, food preparation, accessing information directories), or inter-personal skills (e.g., affective assertiveness, stress management, ability to give positive reinforcement).

D. **RECREATIONAL GROUPS**

HIPAA

- H0022-Alcohol and/or drug intervention service (planned facilitation).

ADAD

- These groups involve the client in learning leisure-time activities.

- In order to be reimbursable as a treatment session:
  1. The goals for the activity must be specified in the treatment plan,
  2. A counselor must be actively involved in facilitating the group, and
  3. The participants must have an opportunity to discuss their participation in the activity.
Family Sessions May Include the Following:

A. **FAMILY COUNSELING**

HIPAA

- T1006-Alcohol and/or substance abuse services, family/couple counseling.

ADAD

- Family counseling is the utilization of special skills to assist families in achieving objectives through the exploration of a problem and its ramifications, examination of attitudes and feelings, consideration of alternative solutions, and decision-making. Behavioral, cognitive, interpersonal strategies/approaches may be used.

- The "family" may involve parents, children, partners or other significant others within the client's home environment who will have a major role to play in the client's recovery, e.g., aunts, foster parents, boarding home operators.

- Large groups of multiple family members shall be reimbursed under the group rate.

Wait List Management and Interim Services  
Policy and Procedures

I. Wait List Policy and Procedures

A. A wait list is a list of clients who have been screened and determined to be eligible for future admission for services when no open slots currently exist.

B. Each program funded by the Alcohol and Drug Abuse Division (ADAD) shall notify ADAD of its Wait List status weekly (before noon on the first working day of each week). Each program shall FAX or hand-deliver at least one ADAD Client Wait List Status Form indicating whether or not it has reached 90% capacity. Any request for services the program has received from a pregnant woman or injection drug user during that week shall be recorded on that form or a duplicate and sent to ADAD within the same time frame.

C. Each program funded by ADAD shall develop and implement a Wait List Management Policy and Procedures that includes the requirements listed below:

1. The screening process used to determine an individual's eligibility for inclusion on the wait list, including procedures and a form for documenting initial screening, admissions, and referrals.

2. Instructions for what individuals must do to remain on a wait list and be eligible for services, as well as criteria for the removal of a person from the wait list.

3. Review criteria and procedures to ensure the accuracy of the wait list, which shall include:

   a. Who reviews the list;
   b. How frequently the list is reviewed;
   c. Disposition data specifying whether the individual continues to be eligible or is dropped from the wait list because he/she is no longer interested, has found other treatment, cannot be contacted or did not maintain contact with the program at specified intervals, and how and where removed names are recorded for statistical purposes; and
   d. Specification that individuals who are removed from the list will not be barred from reapplying for services. Pregnant women and injection drug users (IDU) will be given preference at the time of reapplication (as specified in item number 8, below).
4. Procedures shall be developed for maintaining contact with individuals on the wait list.

   Contact:
   a. May be face-to-face (which is preferred), by telephone, or by mail;
   b. Shall be made every 30 days at a minimum; more frequently is preferable;
   c. When initiated by the program requires that client confidentiality be protected.

Contact procedures shall be clearly communicated to the prospective client when agreement is reached to place a person on the list. Maintaining contact is ideally the individual's responsibility. However, due to the characteristics of substance abusers, treatment programs shall assume additional responsibility to maintain contact with the individual seeking treatment.

5. Procedures shall be implemented for the use of a Wait List Log, which shall document the following information:

   a. Date of the initial request for services, screening date, date of and reason for removal from wait list (e.g., began treatment, could not locate, etc.);
   b. Name and position of staff person completing the information, location where the screening is performed, and the medium used to conduct the screening (face-to-face, by telephone, etc.);
   c. Client's name, ID number, and indication if the client is a pregnant woman or injection drug user;
   d. Disposition of the client (referred to treatment at another facility, placed on the wait list, or admitted into treatment). The disposition for wait list placements should indicate that the individual is (1) potentially eligible for treatment admission and (2) consents to be placed on the list because he/she either cannot be referred or does not wish to accept a referral.

6. Copies of the original screening forms for each client placed on the wait list shall be kept in a file together with the Wait List Log.

7. An individual file shall be created for each client placed on the wait list. This file shall hold additional information necessary for contact, referral and admission, such as:

   a. Demographics: age, residence, ability to pay or payment source, mailing address, telephone number and similar information about alternative contacts (referral source or relative, name, permanent address, etc.);
   b. Assessment: current status of substance abuse and associated problems;
   c. Contact: dates, types and outcomes of subsequent contacts;
   d. Referral: when the client was referred to another program, the program recommended, how the referral was made (e.g., by phone, letter or in person);
e. Follow-up: subsequent contacts with the referral program to determine the outcome of the referral.

If the client is subsequently admitted, the Individual Wait List File will be added as an identifiable section to the regular client file. If the client is not admitted this file shall be retained separately.

8. All treatment programs serving an injection drug abuse population shall have a policy for and shall provide preference in admission to treatment for pregnant women and injection drug users in the following order:
   a. Pregnant injecting drug users,
   b. Pregnant substance abusers,
   c. Injecting drug users, and
   d. All others.

9. In addition to wait-list policies and procedures required for the general population, IDUs and pregnant women shall be responded to in the following manner:
   a. Pregnant Women:
      1) If a treatment program does not have the capacity to immediately admit a pregnant woman to treatment, or if placement in the program is not appropriate, it must refer the woman to another program that can admit her to treatment.
      2) If no other program has the capacity to admit the pregnant woman to treatment, then the program must:
         (a) Provide interim services (see part II of this attachment) within 48 hours; or
         (b) Refer the pregnant women to the ADAD-designated women's agency for interim services, which in turn must provide interim services within 48 hours.
   b. Injection Drug Users:
      1) If a treatment program does not have the capacity to admit an IDU to treatment within 14 days of the initial request, it must refer the applicant to another program that can admit the wait-listed client to treatment within 14 days.
      2) If no program has the capacity to admit the IDU to treatment within 14 days, then the program must:
         (a) Provide interim services within 48 hours; or
         (b) Refer the IDU to the ADAD-designated Opioid Therapy Outpatient Treatment Program for interim services.
      3) IDU clients in interim services must be admitted to treatment within 120 days of the initial request.
a. Each ADAD-funded substance abuse treatment program shall inform ADAD of every request for services that it receives from a pregnant woman or IDU, and of the status of the client who made the request. The program shall do the following:

1) Submit the required information for each client on the ADAD Client Wait List Status Form as found at the end of this Attachment.
2) Before 12 noon on the first working day of each week, fax one form for each pregnant and/or IDU applicant from the previous week. At least one form shall be faxed to ADAD each week, indicating whether the program has reached 90% capacity during the previous week.

II. Interim Services Policy for Pregnant Women and Injection Drug Users

A. Interim services are services that are provided until a client is admitted to a substance abuse treatment program. The purposes of the services are to reduce the adverse health effects of such abuse, promote the health of the client, and reduce the risk of transmission of disease.

B. Each program funded by the Alcohol and Drug Abuse Division (ADAD) shall develop and implement an Interim Services Policy and Procedures that includes the following elements:

1. For each client placed in Interim Services, the program shall keep a record of the number of days between the request for treatment and the admission to treatment.

2. At a minimum, interim services shall include counseling and education about the following:

   a. HIV and tuberculosis (TB),
   b. The risks of needle-sharing,
   c. The risks of transmission to sexual partners and infants,
   d. Steps that can be taken to ensure that HIV and TB transmission does not occur,
   e. Referral for HIV or TB treatment services if necessary.

3. For pregnant women, interim services also include:

   a. Counseling on the effects of alcohol and drug use on the fetus, and
   b. Referral for prenatal care.
C. Every program shall keep information in the individual client’s file for each interim services client. This includes but is not limited to the following records:

1) Date of the client's entry into interim services,
2) Source of client's referral into interim services,
3) Application form,
4) A screening or assessment form,
5) Number of days elapsed since the initial request for treatment,
6) An interim plan of action,
7) A log of the services provided including the date on which services were provided,

Principles of Effective Treatment
National Institute on Drug Abuse (NIDA)

1. No single treatment is appropriate for all individuals.
   Matching treatment settings, interventions, and services to each individual’s particular problems and needs is critical to his or her ultimate success in returning to productive functioning in the family, workplace, and society.

2. Treatment needs to be readily available.
   Because individuals who are addicted to drugs may be uncertain about entering treatment, taking advantage of opportunities when they are ready for treatment is crucial. Potential treatment applicants can be lost if treatment is not immediately available or is not readily accessible.

3. Effective treatment attends to multiple needs of the individual, not just his or her drug use.
   To be effective, treatment must address the individual’s drug use and any associated medical, psychological, social, vocational, and legal problems.

4. An individual’s treatment and services plan must be assessed continually and modified periodically to ensure that the plan meets the person’s changing needs.
   A patient may require varying combinations of services and treatment components during the course of treatment and recovery. In addition to counseling or psychotherapy, a patient at times may require medication, other medical services, family therapy, parenting instruction, vocational rehabilitation, and social and legal services. It is critical that the treatment approach be appropriate to the individual’s age, gender, ethnicity, and culture.

5. Remaining in treatment for an adequate period of time is critical for treatment effectiveness.
   The appropriate duration for an individual depends on his her problems and needs. Research indicates that for most patients, the threshold of significant improvements is reached at about 3 months in treatment. After this threshold is reached, additional treatment can produce further progress toward recovery. Because people often leave treatment prematurely, programs should include strategies to engage and keep patients in treatment.

6. Individual and/or group counseling and other behavioral therapies are critical components of effective treatment for addiction.
   In therapy, patients address issues of motivation, build skills to resist drug use, replace drug-using activities with constructive and rewarding nondrug-using activities, and improve problem-solving abilities. Behavioral therapy also facilitates interpersonal relationships and the individual’s ability to function in the family and community.

7. Medications are an important element of treatment for many patients, especially when combined with counseling and other behavioral therapies.
   Methadone and levo-alpha-acetylmethadol (LAAM) are very effective in helping individuals addicted to heroin or other opiates stabilize their lives and reduce their illicit drug use. Naltrexone is also an effective medication for some opiate addicts and some patients with co-occurring alcohol dependence. For persons addicted to nicotine, a
nicotine replacement product (such as patches or gum) or an oral medication (such as bupropion) can be an effective component of treatment. For patients with mental disorders, both behavioral treatmentss and medications can be critically important.

8. Addicted or drug-abusing individuals with coexisting mental disorders should have both disorders treated in an integrated way. Because addictive disorders and mental disorders often occur in the same individual, patients presenting for either condition should be assessed and treated for the co-occurrence of the other type of disorder.

9. Medical detoxification is only the first stage of addiction treatment and by itself does little to change long-term drug use. Medical detoxification safely manages the acute physical symptoms of withdrawal associated with stopping drug use. While detoxification alone is rarely sufficient to help addicts achieve long-term abstinence, for some individuals it is a strongly indicated precursor to effective drug addition treatment.

10. Treatment does not need to be voluntary to be effective. Strong motivation can facilitate the treatment process. Sanctions or enticements in the family, employment setting, or criminal justice system can increase significantly both treatment entry and retention rates and the success of drug treatment interventions.

11. Possible drug use during treatment must be monitored continuously. Lapses to drug use can occur during treatment. The objective monitoring of a patient’s drug and alcohol use during treatment, such as through urinalysis or other tests, can help the patient withstand urges to use drugs. Such monitoring also can provide early evidence of drug use so that the individual’s treatment plan can be adjusted. Feedback to patients who test positive for illicit drug use is an important element of monitoring.

12. Treatment programs should provide assessment for HIV/AIDS, Hepatitis B and C, tuberculosis, and other infectious diseases, and counseling to help individuals modify or change behaviors that place themselves or others at risk of infection. Counseling can help patients avoid high-risk behavior. Counseling also can help people who are already infected manage their illness.

13. Recovery from drug addiction can be a long-term process and frequently requires multiple episodes of treatment. As with other chronic illnesses, relapses to drug use can occur during or after successful treatment episodes. Addicted individuals may require prolonged treatment and multiple episodes of treatment to achieve long-term abstinence and fully restored functioning. Participation in self-help support programs during and following treatment often is helpful in maintaining abstinence.

Request for Information (RFI)  
RFP 440-1-11  
Substance Abuse School-Based Treatment Services  

Summary of RFI  

As part of its planning process the Alcohol and Drug Abuse Division (ADAD) scheduled a total of three (3) public requests for information forums to gather information for school-based outpatient substance abuse treatment services for twenty-eight (28) middle schools on Oahu, Hawaii, and Maui County. The Oahu RFI forum was held on July 7, 2006 at the Kinau Hale Board room, from 1:00 pm to 3:00 pm., with seven (7) participants. The Hawaii RFI forum was held on July 10, 2006 at the Hilo District Office from 10:00 am to 12:00 noon, with three (3) participants. The Maui County RFI forum was held on July 11, 2006, at the Maui District Health Office from 10:00 am to 12:00 noon, with one (1) participant. At each of the RFI forums a draft copy of the Request For Proposal (RFP), Section 2, Service Specifications and the Attachment E-1, Substance Abuse Treatment Guidelines were issued to the participants. Copies of these handouts were also faxed to two neighbor island participants who informed ADAD that they would not be able to attend, and requested the information that was disseminated at the RFI. Participants were also informed to e-mail any additional comments to ADAD by July 12, 2006.  

ADAD will be awarding approximately $1,817,500 in funding for Outpatient School-Based substance abuse treatment services for adolescents who meet either the Diagnostic and Statistical Manual of Mental Disorders IV, Text Revision (DSM-IV-TR) criteria for substance abuse or dependence or the American Society for Addiction Medicine Patient Placement Criteria (ASAM PPC), in twenty eight (28) middle/intermediate schools. There are twenty-one (21) schools on Oahu, four (4) schools on Hawaii and three (3) schools in Maui County.  

- A recommendation expressed in all three RFI forums was the need to be able to bill for a minimum of 15 minutes such as during recess and lunch periods.  

ADAD has taken this into consideration and will implement this recommendation. Activities that may be billed include a structured pre-planned group activity and an individual session for crisis counseling only that is properly documented. The 15 minute client face-to-face interaction could be billed only during school hours (lunch recess, etc.).
• A recommendation was made to integrate treatment with the DOE schedule.

  As stated previously, since ADAD will allow billing to occur at 15 minute intervals, this recommendation will not be necessary.

• A recommendation was made to allow the submission of the agency’s policy and procedures and Memorandum of Agreement (MOA) with the contracted schools to occur after the award is made rather than with the agency’s request for proposal.

  ADAD will implement this recommendation.

• A recommendation was made that ADAD should have an MOA with the Department of Education, in order to prepare the new schools for Outpatient school-based treatment services.

  It was explained in all of the RFI forums that the Department of Health is currently working with the DOE administratively, for this purpose.

• A recommendation was made to have the RFP state that clients may meet either the ASAM PPC or the DSM-IV-TR and not just the DSM-IV.

  ADAD will implement this recommendation.

• A recommendation was made to have the RFP state that the range for client eligibility on the ASAM PPC-2R is from level 0.5 Early Intervention to level I Outpatient Treatment.

  ADAD will implement this recommendation.

• A recommendation was made to allow the providers to submit their proposals based on their preference of individual schools as opposed to submitting by groupings or complex.

  ADAD will implement this recommendation.

• A recommendation was made to give additional funds, beyond the maximum $90,000.00 that was awarded to schools with enrollments above 600 students, to schools that have considerably high enrollments i.e. Mililani and Kapolei.

  If additional funding becomes available, ADAD will consider implementing this recommendation for schools based on need and enrollment.
• A recommendation was made that the $25,000.00 start up cost should used to purchase a van.

**ADAD does not agree that the start up funds should be used toward van purchases. If additional funds become available, ADAD has a preference to help infrastructure development.**

• A recommendation was made that the administrative cost for computers that would be needed for the upcoming ADAD WITS system should not be taken out of the funding for the schools.

**Administrative cost is included within the designated funds, and leaves the utilization of the awarded funds to the provider’s discretion.**

• A recommendation was made to have ADAD clarify the correct student population for Pahala middle school since there is a concern that the enrollment may actually be higher than what is stated in the RFP. The concern of the possibility of Naalehu and Pahala middle schools enrollments being combined was expressed.

**In preparing for how the funds would be distributed among the schools, ADAD used the DOE Official Enrollment Count, 2004 – 2005 School Year, which was the most current document at that time. The cost estimate for each school was based on enrollment. Schools with less than 150 students were designated to receive $10,000.00. Pahala’s middle school enrollment is 40 and Naalehu’s middle school enrollment is 79, therefore, even if these enrollments were combined, the total (119 students) enrollment would be less than 150, thereby keeping the funding designation at $10,000.00.**

• A recommendation was made to increase the allotted hours per week. Currently the limit for outpatient school-based treatment is 1 to 8 hours per week. A suggestion was made to allow one week per month, where the maximum hours could be increased to up to twenty (20) hours per week, in order to allow for a complete submersion, experiential type of group to occur, without exceeding the maximum length of service hours, which is 192 hours per client, per year.

**In reviewing the request for proposals ADAD will consider options for innovative approaches in providing substance abuse treatment.**
ASSURANCE REGARDING DRUG-FREE WORKPLACE

The Hawaii Department of Health, Alcohol and Drug Abuse Division (ADAD) is dedicated to providing the leadership necessary for the development and delivery of quality substance abuse prevention, intervention and treatment services for the residents of the State of Hawaii. As a direct recipient of Federal monies to achieve this goal, ADAD must comply with 45 CFR Part 76 to maintain a drug-free workplace.

Although national, State, and local efforts have begun to show encouraging results, the problem of alcohol and other drug abuse remains a serious issue. In addition to helping to reduce alcohol and other drug abuse, employers with successful drug-free workplace programs report decreases in absenteeism, accidents, downtime, turnover, and theft; increases in productivity; and overall improved morale (source: National Clearinghouse for Alcohol and Drug Information). Because of the overwhelming positive effects of Drug-free Workplace Policies, ADAD requires its prospective contractors to comply with the following:

The undersigned (authorized official signing for the applicant organization) certifies that the applicant will, or will continue to, provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the contractor’s workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an ongoing drug-free awareness program to inform employees about--
   (1) The dangers of drug abuse in the workplace;
   (2) The contractor’s policy of maintaining a drug-free workplace;
   (3) Any available drug counseling, rehabilitation, and employee assistance programs; and
   (4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the contract be given a copy of the statement required by paragraph (a) above;

(d) Notifying the employee in the statement required by paragraph (a), above, that, as a condition of employment under the contract, the employee will --
   (1) Abide by the terms of the statement; and
   (2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the Department of Health, Alcohol and Drug Abuse Division (ADAD) in writing within ten working days after receiving notice under paragraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to ADAD on whose contract activity the convicted employee was working. Notice shall include the Department of Health, Administrative Services Office (ASO) contract log number of each affected contract;

For purposes of paragraph (e) regarding agency notification of criminal drug convictions, ADAD has designated the following central point for receipt of such notices:
1

Department of Health, Alcohol and Drug Abuse Division
601 Kamokila Boulevard, Room 360
Kapolei, HI 96707

(f) Taking one of the following actions, within 30 calendar days of receiving notice under paragraph (d)(2), with respect to any employee who is so convicted--

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency; and

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

Failure to comply with this policy may be considered a violation of the contract and may result in suspension of payments or termination of the contract. Please refer to ADAD’s written policy regarding Drug-free Workplace Policy Requirements Affecting Contracted Providers for more information.

In addition to the above requirements, ADAD recommends that the Drug-free Policy be written to include the following, based on The National Clearinghouse for Alcohol and Drug Information (NCADI) recommendations:

(1) **Rationale**, including the reason for the policy, what the policy is designed to do, and how it was developed;

(2) **Expectations and Prohibitions**, including the employee behaviors that are expected, and exactly what substances and behaviors are prohibited;

(3) **Consequences and Appeals**, including precisely what will happen if an employee violates the policy, procedures for determining if an employee has violated the policy, and how appeals will be handled; and

(4) **Benefits and Assurances**, including efforts to help employees comply with the policy, how requests for help will be handled, how employee confidentiality will be protected and how fairness and consistency will be maintained.

*If further assistance is required to develop a suitable Drug-free Workplace Policy, please contact the Center for Substance Abuse Prevention’s (CSAP) Workplace Hotline at 1-800-WORKPLACE.*
