16. Chief Procurement Officer's comments:

There are other hand held dual mode narcotics/explosive detection systems/devices available besides the GE Security Mobile Trace. The homeland security industry is an expanding industry, with an endless supply of new security devices entering the market. It is recommended the PSD issue a competitive solicitation for subject type detection systems/devices.

8. Feature: The good, service or construction has the following unique features, characteristics, or capabilities:
Mobile Trace Handheld Detector

Mobile Trace is the first handheld trace detector on the market to simultaneously detect positive and negative ions, expanding the range of target narcotics in a single sample, while also detecting explosives, enabling faster, more comprehensive security screening. Mobile Trace relies on GE's patented ITMS (Ion Trap Mobility Spectrometry) technology to deliver the narcotics and explosives detection sensitivity and reliability proven at military bases, border crossings, airports, correctional facilities, and other critical security checkpoints around world.

Very easy to operate, Mobile Trace provides reliable detection in a package that is user-friendly and field-friendly. Mobile Trace's user interface is intuitive and easy to learn, with touch-screen menu-driven commands. Mobile Trace can be field powered using state-of-the-art LI Ion batteries with hot-swappable features, allowing the user to keep the instrument up and running during battery change-out. The Mobile Trace is designed to interface with other systems via Ethernet or USB communication, enabling in-depth analysis and file management from desktops or by multiple users.

9. Essential Features. How the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:

The unique features of this equipment will add a formidable weapon with the prevention of Prison Contraband (Illegal Drugs, Weapons, and other Illegal Substances) with minimum intrusion of a person(s) right to privacy and their Civil Rights. The department will be able to screen persons, packages, deliveries, visitors, employees, mail, Cells, corridors, lockers, locker rooms, tools boxes, almost any items that enters a facility without opening, touching, or any other evasive method.

The Mobile Trace Handheld Detector will allow employees to screen packages, deliveries, tools, vehicles, cells, rooms etc. using two methods by particle swiping or vapor sampling. This dual mode provides greater flexibility and expansion of the equipments uses along with it portability and user friendly application/operation.

Weapons and Narcotic detection is essential to the proper reintegration of inmates and to the success of a facilities daily operation to protect everyone's health and safety ensuring public safety.
