

JUN -5 P2

STATE PROCUREMENT OFFICE NOTICE OF AMENDMENT TO SOLE SOURCE CONTRACT

1. TO: Chief Procurement Officer
2. FROM: Health/State Laboratories/Medical Microbiology
Department/Division/Agency

3. Name of Contractor: Gen-Probe, Inc.
4. Sole Source Reference Number: 08-050-J 5. Contract Number:

6. Description of goods, services, or construction:
Laboratory Tests Kits based on nucleic acid amplification procedures, target capture, and dual kinetic assay.

7. Approval to amend is submitted in order to:
 Revise the scope of services for the contract as follows:
Increase the contract price from \$300,000 to \$500,000.

<input checked="" type="checkbox"/> Increase contract price by 10 % or more:	Original Contract Price:\$300,000	Amended Contract Price: \$500,000
--	-----------------------------------	-----------------------------------

8. Reason: This / These amendment(s) are necessary because:
The STD Control Program of the STD/AIDS Branch has informed the State Laboratories Division's Medical Microbiology Branch that based on current program projections will require an estimated price of \$500,000 for reagent test kits and accessories during this contract period.

9. Direct questions to: Gail Y. Kunimoto Phone: 453-6700

Agency shall ensure adherence to applicable administrative and statutory requirements.

10. Pursuant to § 103D-306, HRS, and § 3-122-82, HAR, I certify that the information provided above is, to the best of my knowledge, true and correct

[Signature]
Department Head Date JUN 6 8 2008

Reserved for SPO Use Only

11. Date Notice Posted: 6/13/08
12. Submit written objections to this notice of amendment to Sole Source Contract within seven calendar days or as otherwise allowed from the above posted date to: Chief Procurement Officer
State Procurement Office
P.O. Box 119
Honolulu, Hawaii 96810-0119

Chief Procurement Officer's Comments :

13. APPROVED DISAPPROVED NO ACTION REQUIRED

14. S.S.No. 08-050-J

STATE PROCUREMENT OFFICE
NOTICE & REQUEST FOR SOLE SOURCE

1. TO: Chief Procurement Officer
2. FROM: Health/State Laboratories Division/Medical Microbiology
Department/Division/Agency

Pursuant to §103D-306, HRS, and Subchapter 9, Chapter 3-122, HAR, the Department requests sole source approval to purchase the following:

3. Description of goods, services, or construction:
(Laboratory Test Kits based on nucleic acid amplification procedures, target capture, and dual kinetic assay)

4. Vendor Name: GEN-PROBE, INC
Address: 10210 Genetic Center Drive
San Diego, California 92121-4362

5. Price:
\$300,000

6. Term of Contract:
(mm/dd/yyyy) From: Upon CPO Approval To: 12 Months

7. Prior Sole Source Ref No.
07-048C

8. Feature: The good, service, or construction has the following unique features, characteristics, or capabilities: The test kits are designed to provide laboratory evidence of infection by microbial agents. The analytical method used in these test kits are based on a concept termed target capture to yield the analyte to be amplified. The amplification procedure increases the sensitivity, which is the ability of the assay to detect small amounts of the agent in the specimen. The concept of target capture, decreases the possibility of the amplification of an incorrect genetic material, which could lead to false positive findings.

Genetic material, such as DNA and RNA are unique to each species of microbial agents, These kits are specifically prepared segments of genetic materials linked to a chemical marker. Genetic material recovered from patient's specimens are prepared and allowed to react with these prepared segments. In the event that the prepared segments and the isolate's segments match, a binding occurs and through the use of a chemical reaction, a positive signal is sent to an instrument. In the event of a non match, no binding occurs and no chemical reaction occurs and a negative response is sent to the instrument. A positive signal is an indication of the identity of the organism. This procedure, since it uses the specific genetic material from known organisms and the binding phenomenon is unique for each species, produces highly accurate results. The use of the procedure is rapid and accurate.

This method is highly sensitive and specific. Due to the use of instrumentation and known reagents based on genetic material, the results are objective and highly accurate. The use of these kits allow for the rapid diagnoses of patients, however, without the ability to recover the organism. (continued on attached sheet)

16. Chief Procurement Officer's comments:

17.
