8. Feature: The good, service, or construction has the following unique features, characteristics, or capabilities:
A major target group of the State's Tobacco Control Section is youth ages 11 to 17. Mall traffic studies have shown that youth in this age group gravitate toward shopping outlets, movie theaters, and would include their attached parking structures. Advertising and marketing in these areas provide the Department of Health (DOH) the opportunity to capitalize on the traffic generated by the shopping centers. By utilizing professionally designed poster/billboard ads in shopping centers and malls, the DOH can target their advertising and marketing efforts to specific teenage population that frequent these particular areas. DOH evaluations have demonstrated that 9 out of 10 teens surveyed are aware of the DOH ad walls anti-smoking ads.

9. Essential features. How the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:
A statewide media and counter-marketing campaign is a core component of the DOH's comprehensive Tobacco Control Section to reduce tobacco consumption in Hawaii. A shopping center and mall poster/billboard advertising campaign is an essential part of the teen anti-smoking program. Other portions of the DOH youth-focused campaigns utilize television advertising, advertising slides in movie theaters and advertising space in magazines read by teens to reinforce a no smoking message.

16. Chief Procurement Officer's comments:

This request does not fulfill the requirements of a sole source procurement under HRS section 103D-306. Based on the information provided, the department has determined that target audience can be reached by advertising on ad boards in shopping centers, malls and parking structures. Agency was advised to re-submit their request as an exemption from 103D as the vendor is contracted by the mall, shopping center and building management.
