Since persons who are severely and persistently mentally ill typically manifest varying levels of need for care and often experience cyclical episodes of recurrence of the illness, a variety of service and housing options must be provided simultaneously to the individual and tailored to meet his/her current

needs. Among these required services are those which must address the needs of persons when they are homeless, when they are experiencing a bout of illness or in relapse, and when services sought reflect the assumption that services provided to persons who are severe and persistent mentally ill, are community-based, are well-coordinated, and produce outcomes that benefit both the consumer and society.

B. Planning activities conducted in preparation for this RFP

The DIVISION published a Request for Information on January 8, 2007 seeking the public's input in the design of the revised scopes of services for the Community-Based Intervention fund, the availability of potential service providers, and the staffing capabilities of providers.

A series of planning events, including needs assessment conducted in 2000, were held with mental health stakeholders (consumers, staff, private providers, advocates, and family members) to determine the range of public mental health services for persons with severe and persistent mental illness. During these meetings, views were expressed on how to improve services and achieve system-wide goals. Most importantly, input had been received for provision of comprehensive, accessible services on each island and in rural locations with a range of housing options, a choice of treatment, and rehabilitation with access to case managers, and other services after regular working hours. Based on these findings, the DIVISION has appropriated funding to provide services to consumers by contracting with purchase of service providers. These services shall reflect national standards of care and best practices and shall be based on a philosophy of recovery-focused and cultural competent treatment, psychosocial rehabilitation and other community supports.

C. Description of the goals of the service

“AMHD is deeply committed to building a system of care which is rooted and grounded in the recovery model. The cornerstone of the recovery process is the centrality of the individual, in their personal definition of meaning and purpose, and the belief that despite the ongoing presence of the illness, people continue to develop.”

Hawai'i's adult mental health service delivery system is based on the concept of recovery, that consumers can lead fulfilling lives even in the presence of a severe and persistent mental illness. Services are focused on the need of the individual, not only on symptom relief and stabilization, but on consumer empowerment and the skills needed to lead satisfying, hopeful and contributing lives.

The goals for the Community-Based Intervention (CBI) program described in this RFP include, but are not limited to, the provision of direct therapeutic support and supervision for skill building and the enhancement of self-care capability and support through the consumer's progression through the recovery process.

Therapeutic support and supervision activities may include, but are not limited to, assisting consumers with living in the community by providing:

1. Wrap-around support and companionship
2. Home maker services
3. Monitoring and assistance with psychiatric and medical issues

The source of funding is state funds or a combination of state and federal funds. Both profit and non-profit organizations are eligible for state funds. Please note that based on the availability of state funds, the amount allocated to providers who are awarded contracts may change.

The DIVISION considers itself the payor of last resort, and expects providers to obtain third party reimbursement as applicable. The DIVISION gives priority to the uninsured.

If an applicant materially fails to comply with terms and conditions of the contract, the DIVISION may, as appropriate under the circumstances:

1. Temporarily withhold payments pending correction of a deficiency or a non-submission of a report by a provider.
2. Disallow all or part of the cost.
