Service Specifications

Section 2

Service Specifications

I. Introduction

A. Overview, purpose or need

The Hawaii Department of Education (DOE) administers the statewide system of public schools. The scope of educational programs and services of the public schools encompasses grades kindergarten through twelve, and such pre-school programs and community/adult education curricula as may be authorized. In addition to regular programs of instruction and support services, the DOE offers special programs and services for students who are disabled, gifted, learning English as a second language, economically and culturally disadvantaged, school-alienated, or institutionally confined. Applicable Federal and State statutes and regulations govern the provision of some behavioral health services (i.e., 34 C.F.R. Section 300 and Hawaii Administrative Rules (HAR) Chapters 53 and 56).

In accordance with the Individuals with Disabilities Education Act (IDEA) and Section 504 – Subpart D of the Rehabilitation Act of 1973 (as amended in 1974), the Department strives to provide a free appropriate public education (FAPE) for students with educational disabilities in the least restrictive environment (LRE). The DOE recognizes the need for a full array of continuum of alternate placements along the least restrictive environment (LRE) continuum.

The purpose of this request for proposals (RFP) is to solicit private providers of Alternative Learning Center (ALC) programs, able to assist students in meeting the requirements of the Hawaii Content and Performance Standards III (HCPS III), the high school graduation requirements, and the General Learner Outcomes (GLO). Interested providers need to develop appropriate academic proficiencies, social behaviors and emotional competencies of the referred students through alternative educational and behavioral health services, with the intent of assisting students to return to their regular school campus.

The DOE anticipates the need to develop contracts to augment services provided by DOE employees in the provision of a variety of intervention and treatment services that reflect the Comprehensive Student Support Services (CSSS) educational model.

The CSSS educational model is a strengths-based, multidisciplinary team decision-making model focusing on learning and personal development. It is based upon the understanding that an individual's capacity to meet expectations is the result of unique inherent characteristics and previous learning opportunities. It promotes the early identification of new learning opportunities to further increase the social, emotional and behavioral repertoire of students.

The DOE, upon evaluating all responsive and responsible Proposals, will select and award the contract determined to be the most advantageous. Refer to Section 4 – Evaluation for a detailed explanation of the evaluation criteria.

B. Description of the goals of the service

As part of an integrated programmatic approach, these services are designed to provide the personalized support necessary to enable students to successfully engage in a standards-based education. The primary goal is to remove barriers to learning through the provision of academic and behavioral health services to students, emphasizing the development of skills necessary to meet the social, emotional and behavioral demands of academic learning and the school community environment.

Intervention and treatment services provided are to be integrated with DOE employee-provided or contracted services in order to ensure timely and appropriate access to a full array of educational and behavioral services that are organized in a coordinated and collaborative manner in an accountable, cost effective, performance-based system for providing services to assist all students to achieve.

Program Objectives and Description:

- 1) To enable the students to meet the requirements of the Hawaii Content and Performance Standards III (HCPS III), General Learner Outcomes, and the high school graduation requirements.*

The undersigned (authorized official signing for the applicant organization) certifies that the statements herein are true, complete, and accurate to the best of his or her knowledge, and that he or she is aware that any false, fictitious, or fraudulent statements or claims may subject him or her to criminal, civil, or administrative penalties. 5. CERTIFICATION REGARDING ENVIRONMENTAL TOBACCO SMOKE

Public Law 103-227, also known as the Pro-Children Act of 1994 (Act), requires that smoking not be permitted in any portion of any indoor facility owned or leased or contracted for by an entity and used routinely or regularly for the provision of health, day care, early childhood development services, education or library services to children under the age of 18, if the services are funded by Federal programs either directly or through State or local governments, by Federal grant, contract, loan, or loan guarantee. The law also applies to children's services that are provided in indoor facilities that are constructed, operated, or maintained with such Federal funds. The law does not apply to children's services provided in private residence, portions of facilities used for inpatient drug or alcohol treatment, service providers whose sole

source of applicable Federal funds is Medicare or Medicaid, or facilities where WIC coupons are redeemed.

Failure to comply with the provisions of the law may result in the imposition of a civil monetary penalty of up to \$1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity.

By signing the certification, the undersigned certifies that the applicant organization will comply with the requirements of the Act and will not allow smoking within any portion of any indoor facility used for the provision of services for children as defined by the Act.

The applicant organization agrees that it will require that the language of this certification be included in any subawards which contain provisions for children's services and that all subrecipients shall certify accordingly.

The Public Health Services strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.
